Education

Lovely Professional University, Phagwara, Punjab <i>Bachelor of Technology in Computer Science Specialisation in DS & ML</i>	2025 – 2029 <i>CGPA: 7.49</i>
Nazareth Academy, Gaya, Bihar <i>Senior Secondary Education</i>	2023 – 2025 <i>Score: 75%</i>
Creane Memorial High School, Gaya, Bihar <i>Secondary Education</i>	2011–2023 <i>Score: 93%</i>

Coursework

- Data Structures
- Data Analysis
- Artificial Intelligence
- Machine Learning
- Software Engineering
- Database Management
- Data Science
- OOPs

Projects

AI-Powered Placement Analysis Dashboard & Data Agent | *Streamlit, Pandas, Gemini AI, Python*

- Built a responsive web dashboard designed for placement coordinators to process and visualize student cohort records.
- Built automated **Pandas** pipeline to ingest CSVs, clean values, and compute cohort placement metrics.
- Seamlessly integrated **Gemini 3.5 Flash** through the **google-genai** SDK, empowering it to function as an intelligent agent that dynamically synthesizes complex cohort trends into actionable, context-aware natural language insights.
- Created analytics charts using **Matplotlib** and **Seaborn** to visualize distribution trends and candidate eligibility profiles .

ML-Powered RTB Bidding Platform | *Machine Learning, CTR Prediction, Python*

- Developed a Demand-Side Platform (DSP) using machine learning to analyze ad impression click-through rates (CTR)
- Implemented advanced data cleaning and feature engineering pipelines to rigorously evaluate CTR metrics and intelligently compute optimal, adaptive real-time bidding parameters for enhanced campaign performance.

Adaptive Learning Platform | *Python, NLP, EdTech*

- Created an AI-powered EdTech application that personalizes study resource delivery based on individual learner scores.
- Utilized natural language processing algorithms to assess student comprehension levels and dynamically adjust test difficulty.

Automatic Prompt Generator | *Generative AI, Prompt Engineering, Python*

- Developed an automation utility that generates high-fidelity prompt templates optimized for LLMs based on custom tasks.
- Reduced manual prompt tuning and repetitive iteration, significantly enhancing response formatting and logic consistency.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Git, GitHub, Jupyter Notebooks, Google Colab Notebook

Technologies/Frameworks: PyTorch, TensorFlow, Scikit-learn, Streamlit, FastAPI, Flask

Achievements & Certifications

- **Participated in Smart India Hackathon** | *University Level*
- **5x Hackathon Finalist** | *Inter-University*
- **Hardware & IoT Experience** | *Prototyping*
- **Oracle Data Platform 2025 Certification** | *Credential ID: 103478762OCI25DCFA*
- **Gemini Certified University Student** | *Google for Education Credential ID: 186672334*
- **Learn JAVA Programming – Beginner to Master** | *Udemy Certificate*
- **Mastering Data Scraping From Web to Insights Workshop** | *upGrad Campus Certificate*
